1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 5-10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Knedlik in view of Menzel. Knedlik discloses the claimed invention except for the storage container and fluid passageway tube being located within a refrigerated zone. Menzel teaches a ice cream maker having a storage container 16 and fluid delivery tube 35 located within a refrigerated zone 2. The delivery tube is inherently made of thermally conductive material. It would be obvious to modify Knedlik so that the storage container 42 is located within the refrigerated zone 20, in view of Menzel, for the purpose of precooling the ice cream mix before freezing.
3. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Knedlik in view of Menzel as applied to claim 5 above, and further in view of Frank. Knedlik discloses the claimed invention except for the step of delivering water to the bowl 24. Frank teaches a frozen beverage machine which includes a step of delivering water to the bowl during the cleaning process at 30. It would be obvious to modify Knedlik so that water is delivered to the bowl, in view of Frank, for the purpose of cleaning the bowl.
4. Applicant's arguments with respect to claims 5-12 have been considered but are moot in view of the new ground(s) of rejection.
